

TRAN QUOC DUNG

Senior Software Engineer & Engineering Team Lead

Email tranquocdung1402@gmail.com

Phone +84 905 242 630

Location Da Nang, Vietnam

Birthday 14 Feb 1993

Gender Male

Status **Open to Work**

PROFESSIONAL SUMMARY

- > 8+ years of backend engineering experience designing microservices, cloud-native systems, and distributed event-driven architectures on GCP.
- > Expert in Java 21 (Virtual Threads, Records), Spring Boot 3.x, Armeria gRPC, MyBatis, PostgreSQL/AlloyDB, Redis, Elasticsearch, and multi-tenant SaaS architecture.
- > Led a 10-engineer team delivering a mission-critical enterprise contract management platform for a Japanese legal-tech company (LegalOn Technologies), consistently hitting 85%+ test coverage across all services.
- > Hands-on with Infrastructure as Code (Terraform, GKE, ArgoCD GitOps), CI/CD pipelines (GitHub Actions), OPA/Rego policy enforcement, and OpenTelemetry observability with Datadog SLO alerting.

TECHNICAL SKILLS

Languages: Java 21, Golang, Python, SQL, JavaScript / TypeScript

Frameworks: Spring Boot 3.x, Spring Security, Spring Data, Spring Cloud, Armeria, gRPC, MyBatis, ReactJS, VueJS

Databases: PostgreSQL, AlloyDB, MySQL, Redis, Elasticsearch, NoSQL

Message Queue: GCP Pub/Sub (event-driven streaming), RabbitMQ (familiar)

Cloud & Infra: GCP (GKE, Pub/Sub, GCS, Firebase), Kubernetes, Terraform, ArgoCD, Docker; AWS-familiar

Security: OAuth2, Spring Security, OPA/Rego policy enforcement, OWASP best practices

Observability: OpenTelemetry, Datadog, SLO/Burn-rate alerting

Architecture: Microservices, Hexagonal / Clean Architecture, Domain-Driven Design, BFF, Event-Driven

CI/CD: GitHub Actions, ArgoCD GitOps, Zero-downtime deployment

Practices: Agile/Scrum, TDD (85%+ coverage), Code Review, API Design, System Scalability

AI-Native Engineering: Claude Code / Codex / Gemini CLI agentic workflows, custom AI agents & MCP, multi-agent orchestration

PROFESSIONAL EXPERIENCE

Engineering Team Lead & Senior Software Engineer | BAP IT JSC

Nov 2022 - Present

Da Nang, Vietnam | Client: LegalOn Technologies, Japan

Marshall - Enterprise Contract Management Platform

Mar 2023 - Present

Multi-tenant legal document processing system on GKE | Team size: 10 | Role: Team Lead

- > Architected and delivered a multi-tenant contract management platform on GKE for LegalOn Technologies (Japan); led a 10-engineer team from design to production.
- > Built event-driven pipelines with GCP Pub/Sub, OAuth2/Spring Security auth, Redis caching, and Elasticsearch full-text search.
- > Maintained 85%+ JUnit test coverage; enforced CI/CD quality gates via GitHub Actions; set up OpenTelemetry + Datadog SLO alerting across 10+ microservices.
- > Mentored engineers on hexagonal architecture; migrated stack to Java 21 Virtual Threads + Spring Boot 3.x, cutting thread contention under peak load.

Stack: Java 21 Spring Boot 3.x Armeria gRPC MyBatis PostgreSQL AlloyDB Redis Elasticsearch Pub/Sub GKE Terraform ArgoCD Datadog GitHub Actions

Freekey - Digital Car Key SDK

Nov 2022 - Mar 2023

Server-side key management SDK for mobile car-door encryption | Role: Developer

- > Developed RESTful APIs for digital key lifecycle (provisioning, revocation, management); enforced security-by-design with JUnit test suites and code review gates.

Stack: Java Spring Boot MySQL JUnit

Java Backend Developer | ARCH Vietnam Co., Ltd

Jun 2018 - Oct 2022

Da Nang, Vietnam

TOPPAN - Enterprise Printing Platform

2022

- > Built admin and user APIs for a B2B printing platform; wrote performance test suites to validate throughput under load.

IBM - Legacy Database Migration

2022

- > Wrote SQL transformation procedures to migrate legacy schema; validated 100% data parity between source and target.

Corelearn - Learning Management System

May 2019

- > Developed course, payment, and user management APIs with Java Servlet; applied security best practices and cross-browser compatibility.

EDUCATION & CERTIFICATIONS

Java Professional Development Certificate

2018

Ivietttech Training Institute Comprehensive Java programming curriculum covering OOP, data structures, design patterns, and enterprise development

HONORS & RECOGNITION

High Performance Leader Award - BAP IT JSC 2025

Recognized for outstanding leadership across a 10-engineer team, on-time delivery of the Marshall platform, and cross-functional collaboration with Japanese stakeholders.

High Performance Project Award - BAP IT JSC 2025

Awarded to the Marshall project team for exceptional delivery quality, technical innovation, and measurable client satisfaction improvement.
