Born: 1993 · Male

• OPEN TO WORK
8+ YEARS EXPERIENCE
TEAM LEAD

AT A GLANCE

8+ Years Exp.	**6+** Projects
85%+ Test Coverage	**Lead** Current Role

CORE TECHNOLOGIES

Java · Golang · Python · ReactJS · VueJS · Spring Boot · SQL / NoSQL · GCP & Firebase · AI-Native Coding · Microservices & gRPC

CORE STRENGTHS

- Team Leadership & Mentoring
- Clean & Hexagonal Architecture
- Agile / Scrum Delivery
- System Design & Scalability
- Code Review & Quality Gates
- Cross-functional Collaboration

PROFESSIONAL SUMMARY

- 8+ years in backend development, microservices design, and cloud-native deployment on GCP.
- Expert in Java 21 (Virtual Threads, Records), Spring Boot 3.x, Armeria gRPC, MyBatis, and PostgreSQL/AlloyDB.
- Proven track record building event-driven pipelines (Pub/Sub), async batch processing systems, and GCS Signed URL file workflows.
- Infrastructure as Code: Terraform, Kubernetes (GKE), ArgoCD GitOps; CI/CD with GitHub Actions and OPA/Rego security policies.
- Observability: OpenTelemetry distributed tracing, Datadog, SLO/burn-rate alerting. 85%+ test coverage across all projects.

PROFESSIONAL EXPERIENCE

BAP IT JSC
Senior Software Developer & Team Lead — 2022 – Present

Marshall — Enterprise Contract Management Platform
2023 – 2026

Enterprise contract management platform for LegalOn Technologies (Japan). Multi-tenant legal document processing system serving Japanese legal teams on GKE.

- **Team size:** 10 · **Role:** Team Lead
- **Environment:** Armeria (Java 21), Spring Boot, gRPC, REST API, PostgreSQL, AlloyDB, GCP, GKE, Pub/Sub, Kubernetes, Terraform
- **Responsibilities:** Create DD, Implement Source, JUnit, Batch, Manage Team, Team Lead
- **Project scope:** Design, CRUD, Manage team, Fix performance, Fix bug production. Renovate lib, Migration data, Migration proto (BSR → self-host)

Java 21 · Spring Boot 3.x · Armeria · gRPC · MyBatis · AlloyDB · Pub/Sub · GCS · GKE · Terraform · ArgoCD · OpenTelemetry · Datadog · OPA/Rego · GitHub Actions

Freekey — Digital Car Key SDK
2022 – 2023

SDK for encrypting and unlocking car doors via mobile app integration with server-side key management.

- Developed admin and user-facing APIs for digital key lifecycle management.
- Ensured security and maintainability through code review and JUnit test suites.

Java Spring · MySQL · JUnit

ARCH VIETNAM CO., LTD
Java Developer — 2018 – 2022

TOPPAN — Printing Website
2022

- Built admin and user APIs for a full-featured printing platform; wrote performance test cases.

Java · A2M5

IBM — Legacy Database Migration
2022

- Wrote SQL transformation procedures; validated data parity between legacy and new schemas.

SQL · A2M5

Corelearn — Learning Management System

May 2019

- Built course, payment, and user management APIs; optimized for security and cross-browser compatibility.

Java Servlet | MySQL | JUnit

EDUCATION & CERTIFICATIONS

2018 — **Iviettech — Java Programming Certificate**
Professional Java development training program

HONORS & AWARDS

2025 — **High Performance Leader Award**
BAP IT JSC

2025 — **High Performance Project Award**
