8+ YRS EXPERIENCE

TECH LEAD

AT A GLANCE

8+ Years Exp.	**6+** Projects
85%+ Test Coverage	**Lead** Current Role

TECHNICAL SKILLS

Languages & Runtime

Java 21 · Virtual Threads · Records · SQL

Frameworks & APIs

Spring Boot 3.x · Armeria (gRPC) · Protocol Buffers · MyBatis

Cloud & Infrastructure

GCP · Kubernetes (GKE) · Terraform · ArgoCD GitOps · Pub/Sub · AlloyDB

CI/CD & DevOps

GitHub Actions · OPA / Rego · SonarCloud · Docker

Observability & Security

OpenTelemetry · Datadog · Workload Identity · pgcrypto · SLO Alerting

Databases

PostgreSQL · AlloyDB · MySQL

Testing

JUnit 5 · Mockito · WireMock · Integration Testing

AI & Productivity

GitHub Copilot · Claude AI · Cursor AI · IntelliJ IDEA

CORE STRENGTHS

- Team Leadership & Mentoring
- Clean & Hexagonal Architecture
- Agile / Scrum Delivery
- System Design & Scalability
- Code Review & Quality Gates
- Cross-functional Collaboration

PROFESSIONAL SUMMARY

- 8+ years in backend development, microservices design, and cloud-native deployment on GCP.
- Expert in **Java 21** (Virtual Threads, Records), **Spring Boot 3.x**, Armeria gRPC, MyBatis, and PostgreSQL/AlloyDB.
- Proven track record building **event-driven pipelines** (Pub/Sub), async batch processing systems, and GCS Signed URL file workflows.
- Infrastructure as Code: **Terraform, Kubernetes (GKE), ArgoCD GitOps**; CI/CD with GitHub Actions and OPA/Rego security policies.
- Observability: OpenTelemetry distributed tracing, Datadog, SLO/burn-rate alerting. **85%+ test coverage** across all projects.

PROFESSIONAL EXPERIENCE

BAP IT JSC
Senior / Tech Lead Java Developer — 2022 – Present

Marshall — Enterprise Contract Management Platform
2022 – 2026

> *Enterprise contract management platform for LegalOn Technologies (Japan). Multi-tenant legal document processing system serving Japanese legal teams on GKE.*

- **Team size:** 20 · **Role:** Team Lead
- **Environment:** Armeria (Java 21), Spring Boot, gRPC, REST API, PostgreSQL, AlloyDB, GCP, GKE, Pub/Sub, Kubernetes, Terraform
- **Responsibilities:** Create DD, Implement Source, JUnit, Batch, Manage Team, Tech Lead
- **Project scope:** Design, CRUD, Manage team, Fix performance, Fix bug production. Renovate lib, Migration data, Migration proto (BSR → self-host)

Java 21 · Spring Boot 3.x · Armeria · gRPC · MyBatis · AlloyDB · Pub/Sub · GCS · GKE · Terraform · ArgoCD · OpenTelemetry · Datadog · OPA/Rego · GitHub Actions

Freekey — Digital Car Key SDK
2022

> *SDK for encrypting and unlocking car doors via mobile app integration with server-side key management.*

- Developed admin and user-facing APIs for digital key lifecycle management.
- Ensured security and maintainability through code review and JUnit test suites.

Java Spring · MySQL · JUnit

ARCH VIETNAM CO., LTD
Java Developer — 2018 – 2022

TOPPAN — Printing Website
2022

- Built admin and user APIs for a full-featured printing platform; wrote performance test cases.

Java · A2M5

IBM — Legacy Database Migration
2022

- Wrote SQL transformation procedures; validated data parity between legacy and new schemas.

SQL · A2M5

Corelearn — Learning Management System

May 2019

- Built course, payment, and user management APIs; optimized for security and cross-browser compatibility.

Java Servlet | MySQL | JUnit

EDUCATION & CERTIFICATIONS

2018 **Iviettech — Java Programming Certificate**
Professional Java development training program
